

Kermode uses a needlepunched felt construction, giving it a “knobbed” omnidirectional appearance. 100% solution-dyed polypropylene fibres give Kermode incredible colour-fastness and stain-resistance, and make it suitable for installation both indoors and outdoors.

- Heavy-duty face weight of 52 oz per square yard
- Standard width of 2-metres, **custom sizes available!**
- Backing made of EM natural-synthetic composite rubber with 15% recycled content
- Total overall weight of 95 oz per sq yd (0.70 lbs per sq ft)
- Holds approx. 7 litres of water per square yard
- Enhanced UV stability to resist fading and sun-bleaching

- Passes C.G.S.B. Standards for Flammability (Pill Test), and meets Flammability Standard DOC-FF-I-70 (Pill Test)
- Completely resistant to most common corrosive/damaging chemicals, such as: caustic sodas, chlorine bleaches, petroleum products and distillates, common ice melters, etc.
- Enhanced UV stability to resist fading and sun-bleaching
- Inherently mold and mildew resistant due to non-absorbent polypropylene construction

We use our computerized precision CNC ultrasonic cutting table to cut out each individual piece of your logo from separate material colours. We then assemble those pieces like a giant jigsaw puzzle to create your custom logo mat – a process far superior to low-quality printed logo mats! Because we cut out individual pieces of material to make each component of your logo, the colours in your mat will never blur, mash together, or rub off, and will stay looking great throughout their service lifespan.
